

# Senior Pet Care: The Essentials

*Proactive. Personalized. Compassionate.  
Better care for more good days.*

## 1 SCREEN EARLY & OFTEN

- Senior screening every 6 months
- Pre-visit questionnaires, photos, or videos
- Trend subtle changes over time

Early detection helps us act sooner and support more good days.

## 2 THE SENIOR ASSESSMENT

- Thorough history & lifestyle review
- Mobility & pain scoring
- Cognitive assessment
- Body condition & muscle condition scoring
- Quality of life discussions

A complete picture helps guide the right care for your patient.

## 3 DIAGNOSTICS MATTER

- CBC/Chem/UA/SDMA
- Blood pressure
- Thyroid testing when indicated
- Imaging & advanced diagnostics as needed
- Establish and track baselines

Baselines today help us make better decisions tomorrow.

## 4 SUPPORT FUNCTION & COMFORT

- Pain management
- Nutrition & weight support
- Environmental modifications
- Mobility aids & rehabilitation
- Hospice & palliative care when appropriate

Comfort, dignity, and quality of life are at the heart of senior care.

## 5 PARTNER WITH FAMILIES

- Shared decision-making
- Discuss goals of care early
- Anticipatory guidance
- Caregiver support matters
- Focus on quality of life, not just longevity

We're in this together—for your patients and their people.

**Senior care is proactive care.** 

Early recognition, individualized care, and compassionate communication improve quality of life for pets and families.

 **OUR PROMISE**

Caring. Compassion.  
Complete Care.

Every pet. Every step.  
Every day.
